

A MIGAL- Tel-Hai joint tenure track position in Computer Science.

MIGAL-Galilee Research Institute together with the Department of Computer Science at Tel-Hai College invite applications for a tenure-track position in the domain of Applied Computer Science. The areas of primary emphasis are Artificial Intelligence, Statistical Learning, Data Imaging, Visual Analytics, Data Science, and/or Computerized Vision. Candidates at all levels with a primary interest in *theory*, but whose research extends into or draws from other *applied* areas as well, are welcome and encouraged to apply. Strong candidates may enjoy benefits such as a reduced teaching load and a substantial allowance for research expenses.

A Ph.D. in Computer Science is required, and a post-doctoral experience is preferred. Successful candidates are expected to pursue an active research program at MIGAL and to contribute significantly to the teaching programs at Tel-Hai.

Applicants should include a CV and contact information for at least three people who can comment on the applicant's professional qualifications.
